Your life, it happens on a floor

It happens on an mflor

Life is always in motion

Every phase brings something new: The moment you fall in love, you move in together, your child is growing up, and the many memories you make along the way. Remember that unexpected night, your child's first steps or Nadine's graduation party? Or what about that time the pizza sauce fell over? Or the iPad that slipped out of your hands? Every moment, big or small, happens on your floor.

You need a floor that takes you through life. A floor that is scratch-proof, easy to clean and that you can enjoy for years. A floor that makes you feel at home, creates memories and is stylish and comfortable at the same time.

That's why people choose mflor

Because... it all happens on an mflor.
Find out which floor is perfect for you.

www.mflor.com

That makes mflor unique

Different types of wood

Mflor LVT flooring is much more than just oak. Be surprised, for example, by the impressive sycamore look of the Broad Leaf series, dive deep into the pine forest with Authentic Hervik or Argyll Fir, or have you ever thought of characteristic chestnut with our Bramber Chestnut colours? And besides that, be sure to check our stylish tiles. With mflor you will always find a floor that suits your style.

Light and dark colours

Of course, mflor offers you beautiful light wood and stone colours, but mflor offers so much more with unique dark colours such as the warm brown shade of the (Parva) Broad Leaf Dark Sycamore, the red-brown glow of the (Parva) Oak Liguria and the striking, dark Nuance Charcoal tiles.

Versatile variants

The possibilities mflor offers are almost endless. Strips in standard sizes, long wide strips, herringbone, XL herringbone, Hungarian point and Viennese point. Install the floor the way you want it! All colour ranges are available as gluedown versions, the most popular floors are also available as click and loose lay versions.

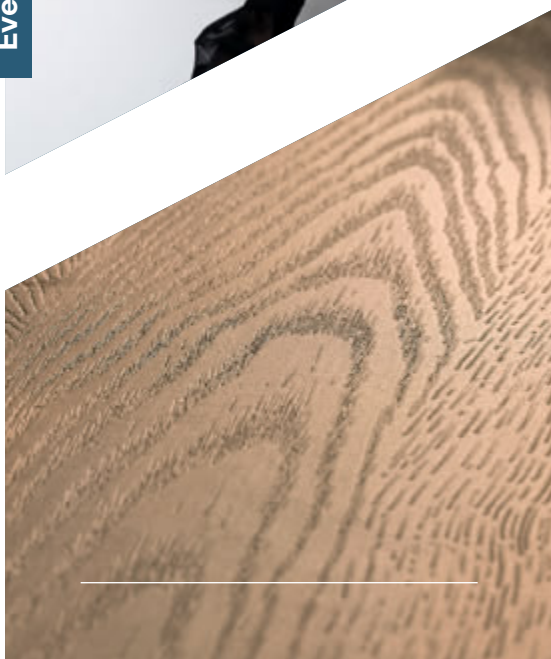

Deep and extra-matt

All our collections feature beautiful, matching embossing. The Authentic series have an extra touch, a 'Natural Touch'. With this in-register embossing (IRE), seeing knots really does mean feeling knots. And with a gloss level of 3 to 4, you can confidently call our floors extra-matt!

Unique designs

Every mflor floor is unique thanks to the great variety of strips. In our Authentic collections, we even use a double film for extra depth and variation. Our distinctive designs give mflor its own place in the market, ideal for those looking for something different from the standard light oak shades.

Every design is unique

The mflor installation types

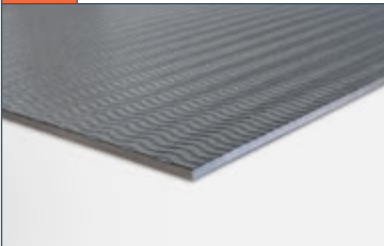

Gluedown

Looking for a sleek, seamless floor that you can enjoy for many years to come? Mflor gluedown floors consist of 2.0 or 2.5 mm thin PVC strips or tiles that are fully glued to the subfloor. This ensures a sturdy and seamless whole and makes the floor suitable for intensive use. Installation requires a stable, levelled foundation and professional gluing.

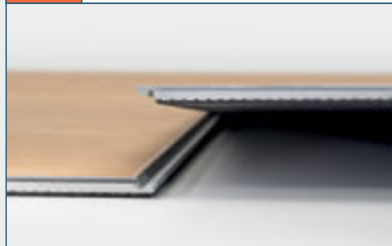

Loose lay

Flexibility and speed without the hassle! An mflor loose lay floor is easily installed without glue or click connections. The 5.0 mm thick PVC strips and tiles easily stay in place thanks to their weight and anti-slip backing. Perfect for a quick makeover and easy to remove. A flat surface is of course essential and for extra stability we do recommend some glue in case of larger surfaces.

Click

Convenience and strength in one! The 5.2 or 5.5 mm thick mflor click strips and tiles have a rigid SPC core, a powerful click locking system and an integrated 1.0 mm thick underlay. This allows them to click together quickly and easily without any glue. Combined, they form a stable, floating floor that hardly works with temperature differences. The IXPE foam underlay offers a 20 dB sound reduction.

You can also add feature strips between your gluedown strips or tiles to give your floor an extra touch.

Width	Height	Intended for	Colours
2.8 mm	2.0 mm	2.0 mm gluedown	Black, grey, beige, brown
3.4 mm	2.3 mm	2.5 mm gluedown	Black, grey, beige, brown
5.0 mm	2.4 mm	2.5 mm gluedown	Black, grey

Mflor has chosen i4F's powerful click locking system. With more than 10 years of experience, i4F is the number one drop-lock system, famed for its extremely high locking strength. Its unique shape makes the profile extremely robust, avoiding squeaking and material fatigue over time.

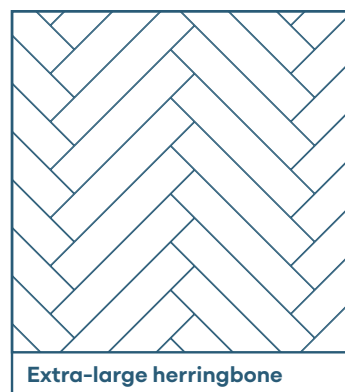

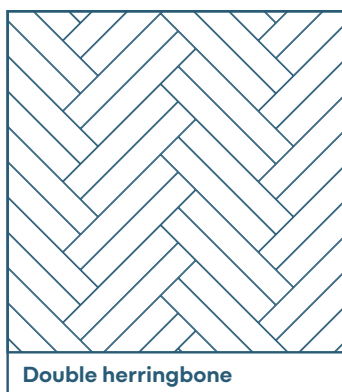

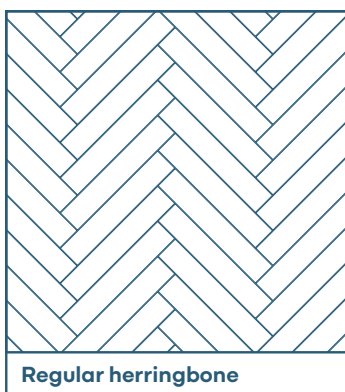

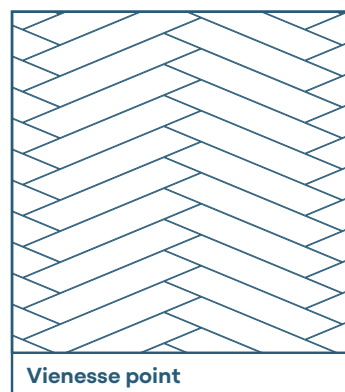

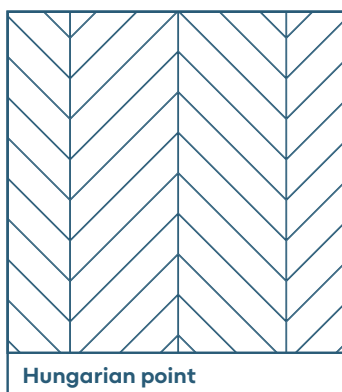

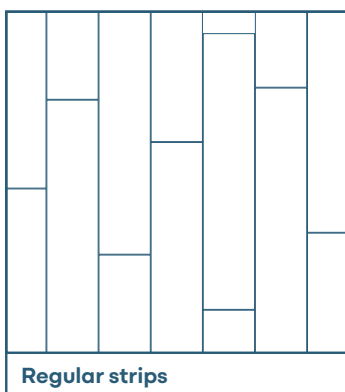

Viennese point

Mflor offers all kinds of ways to incorporate creativity into a personal and unique floor. The creative possibilities are nearly endless!

The mflor options

Mflor floors offer numerous installation options. Several wood-look collections are available in regular or XL sized strips, but also as herringbone and XL herringbone strips. Or have you ever thought about the luxurious-looking Hungarian point or the unique and calm Viennese point patterns?

Abstract

Spark Almond

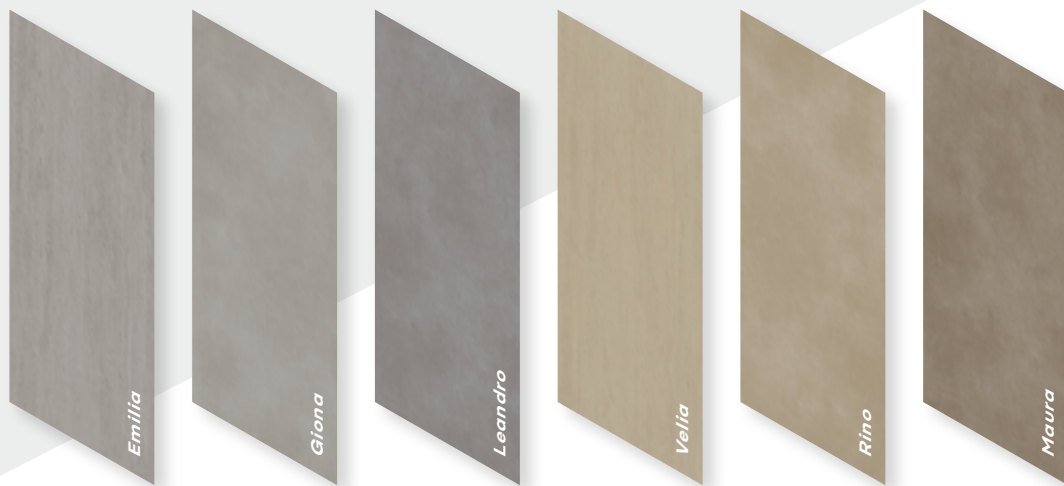

Stylish tiles

Play with shape and appearance with our versatile tile collections, from modern and minimalistic to warm and inviting. Choose sleek rectangles for a dynamic effect or square XL tiles for a grand, harmonious look. Our tiles combine the elegant look of stone or concrete with the comfort and durability of LVT. Get inspired and give your interior a stylish touch.

Abruzzo – Abstract – Fonteyn – Nuance

Abruzzo

Combine strength with tradition

Mountain ranges, limestone, rivers and streams make up the pristine and rugged nature of the Abruzzo National Park, the oldest national park in Italy. With the Abruzzo collection, we have tried to capture the strength and tradition of this region in a tile collection with four tiles with a beautiful stone design and two matching tiles in travertine motif that can be perfectly combined.

Classic wood look

From robust oak to subtle sycamore, from characteristic chestnut to playful pine, our wood-look strips bring the natural charm of wood to your LVT floor. Available in various sizes and installation patterns, like regular strips, herringbone, Hungarian point and Viennese point, each shape and laying method makes every room unique. Discover the possibilities and create a floor that perfectly fits your style.

Argyll Fir — Bramber Chestnut — Broad Leaf — Colton — River Oak

Argyll Fir

Characterful fir, English charm

The Argyll Fir collection draws inspiration from the rich landscapes of England, reflecting its heritage through a beautiful and rich design. This collection brings warmth and elegance to any space, blending rustic charm with modern sophistication, making it the perfect choice for creating inviting interiors with a natural, distinctive look. The 2.0 mm thick strips are an economical choice, still offering the highest mflor quality.

Authentic feel

Mflor Authentic series have an extra touch, a 'Natural Touch'. With this in-register embossing (IRE) technique, the surface structure exactly matches the design. The floor not only looks natural, it also feels like the real thing. This ensures the most natural experience; you see the knot, you feel the knot!

Hervik – Lake – Oak – Plank

Hervik

Feel the nature of Norway

Named after the Hervik fjord and inspired by the breathtaking Norwegian nature with endless pine forests, the Authentic Hervik with its rustic pine wood design is a valuable addition to the mflor range. The natural tones bring charm to any room and the floor features an extra touch, a 'Natural Touch', so the pine's beautiful grain patterns truly add extra texture.

Discover mflor

Visit www.mflor.com for more information and images of all our collections and find a sales point near you.

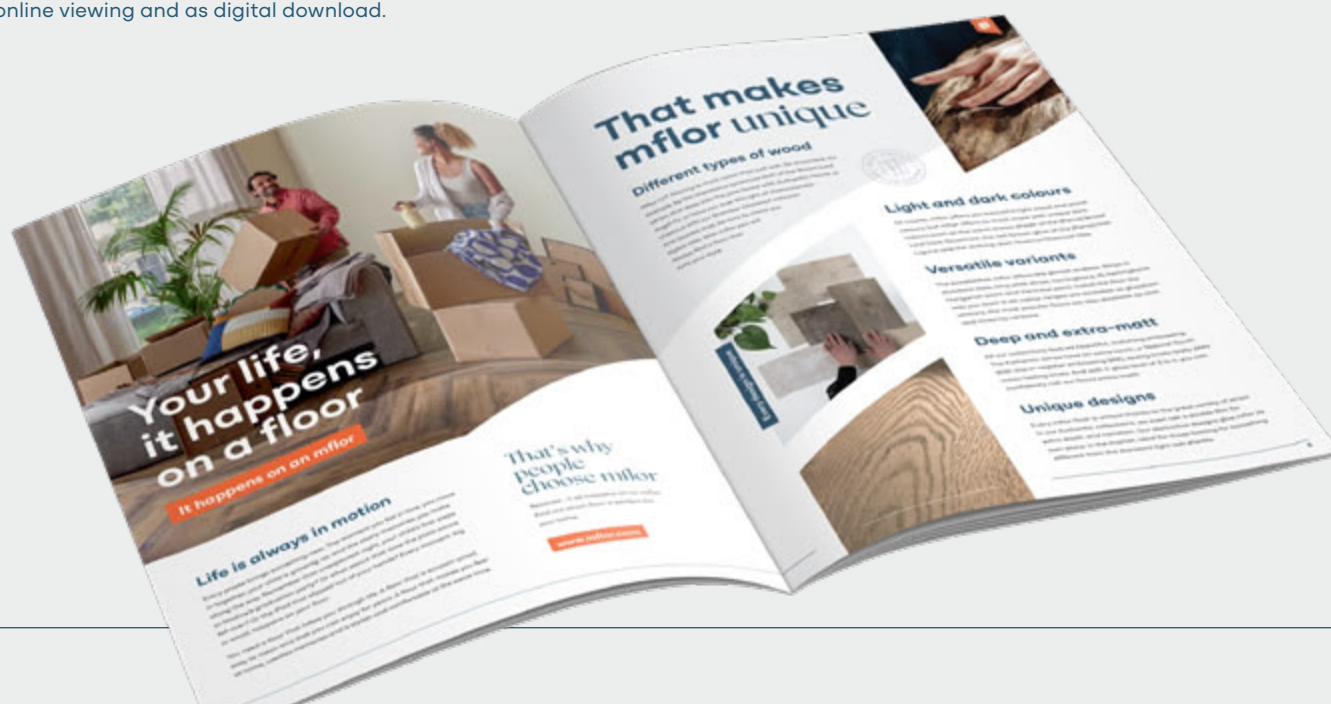

Samples

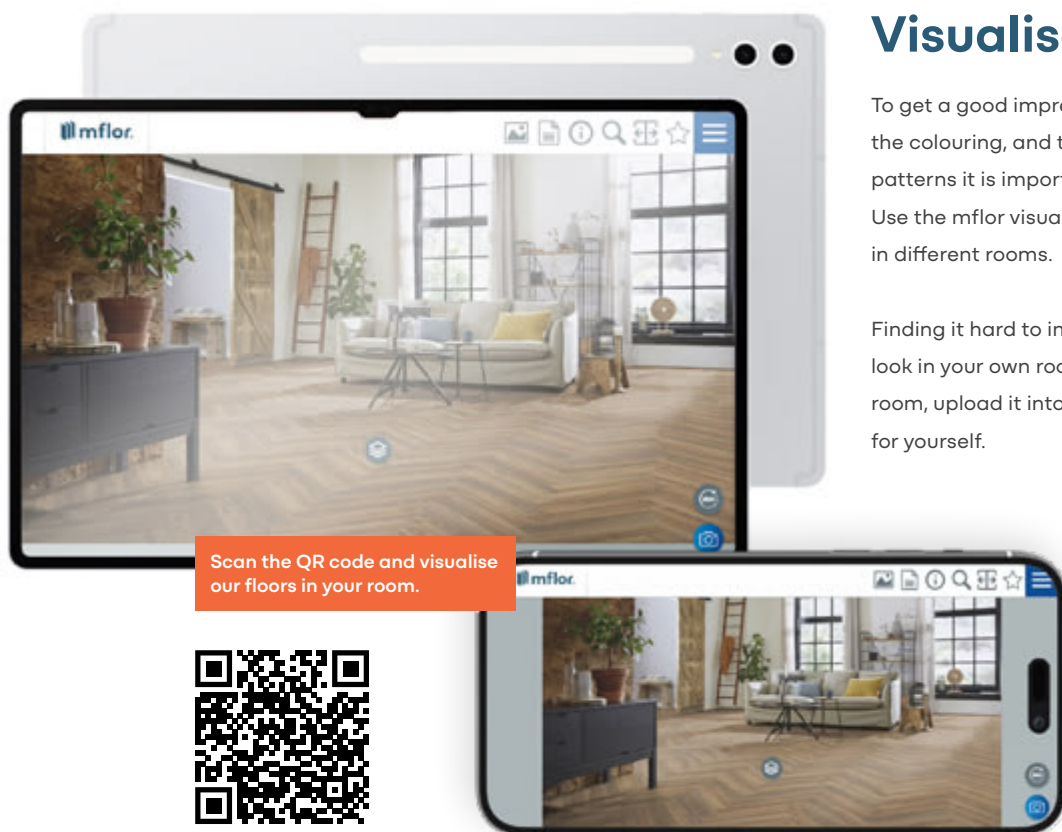

To make a good choice, nothing beats seeing, touching, and comparing the real product. That is why we offer a free sample service. Request up to three small samples completely free of charge at www.mflor.com and they will be delivered to your home within a few days.

Brochure

This brochure is also available online at www.mflor.com for online viewing and as digital download.

Visualiser

To get a good impression of the overall design, the colouring, and the effect of installation patterns it is important to see the bigger picture. Use the mflor visualiser to try out all mflor floors in different rooms.

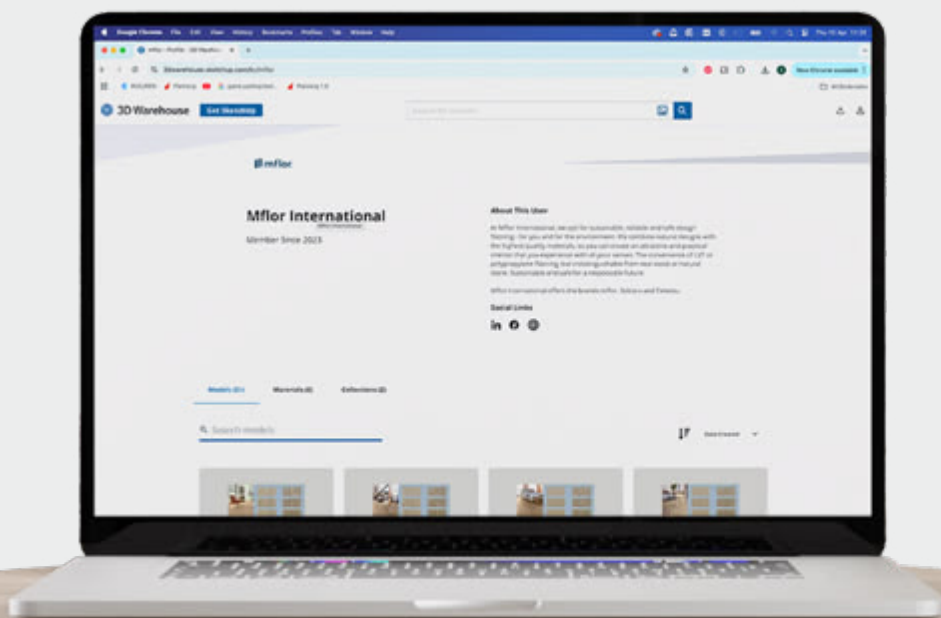

Finding it hard to imagine how an mflor floor will look in your own room? Take a picture of your room, upload it into the mflor visualiser and try for yourself.

Sketchup 3D warehouse

The complete collection of mflor designs is available in the SketchUp 3D warehouse. You can use it for designing interiors and floorplans with SketchUp.

Download the designs for free at
3dwarehouse.sketchup.com/by/mflor

Product features

Mflor's many positive properties ensure years of enjoyment from a beautiful, safe, and worry-free floor. A reassured basis for a pleasant interior.

Strong

Mflor flooring is extremely solid, has a sturdy wear layer and the click collections have a super strong locking system. So your mflor floor will last for years.

Quiet

An mflor floor contributes to pleasant acoustics because of the resilient properties of PVC. With the foam underlay, the click collections offer 20 dB sound reduction.

Water-resistant

PVC or LVT floors are water-resistant. This makes them very easy to clean and makes your mflor floor suitable for almost any room, from office to living room, from kitchen to toilet and bathroom.

Stable

By choosing the best raw materials, we guarantee a quality product without the need for additional additives. 100% safe and stable.

Warm

Our floors have insulating properties, making them pleasantly warm to the touch. And at the same time, mflor is excellent for use with underfloor heating and cooling.

Recyclable

All our floors are sustainable and fully recyclable. We already take environmental impact into account when producing our floors.

Comfortable

An mflor floor feels pleasantly warm, but is also comfortably soft under your feet.

No permanent pressure marks

As mflor floors are resilient, no permanent impressions are left behind. Heavy furniture or stiletto heels are no problem at all.

Scratch- and stain-resistant

Mflor flooring is scratch- and stain-resistant. Convenient when you accidentally drop something on the floor.

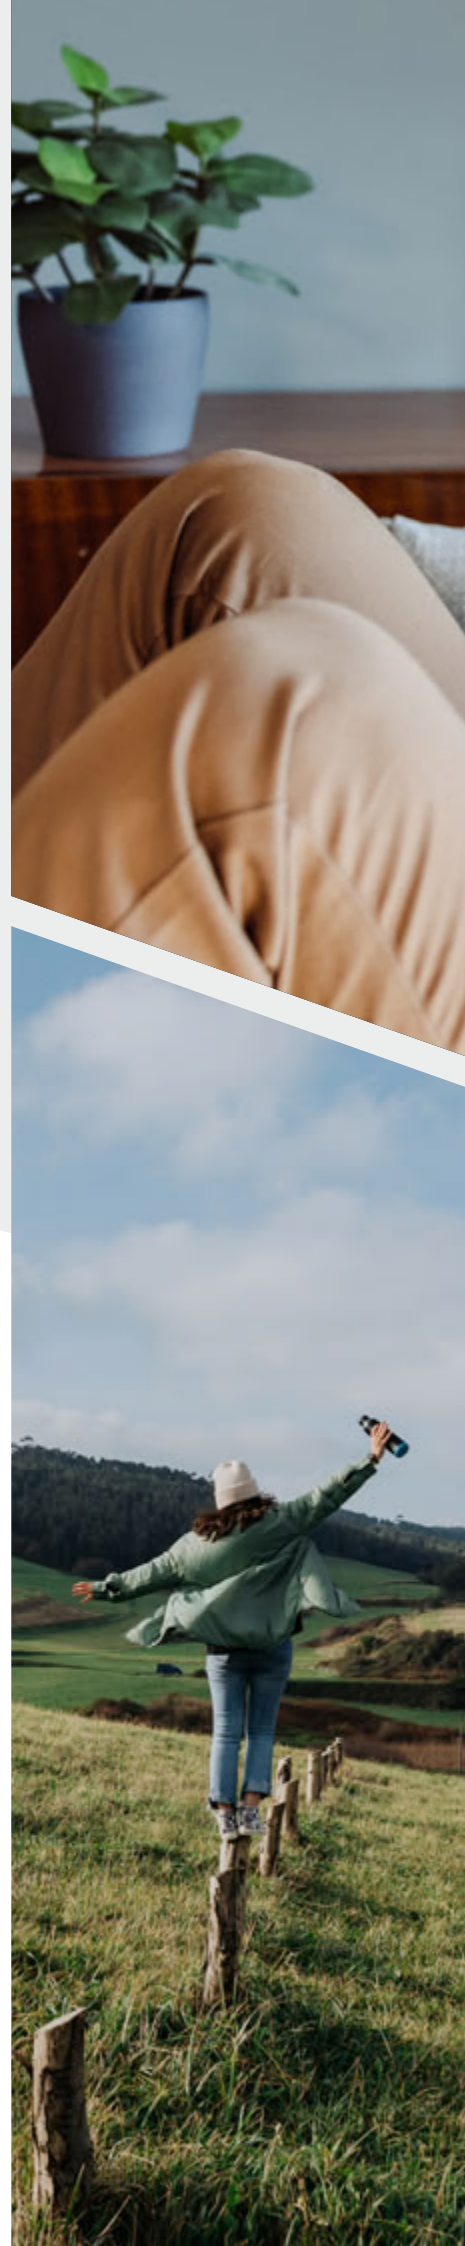

Quality guarantee

We guarantee a long lifetime for our mflor floors; depending on the floor type, up to 20 years!

Mflor is a conscious choice

All the choices we make in the manufacturing of our floors are carefully considered, giving priority to safety, durability, and reliability. This allows us to offer you a sound basis for a pleasant indoor environment. A floor that you choose with your heart and your mind, for you and the generations that follow.

- **ISO certifications: Our production has a minimal impact on the environment**
- **Product waste during the production process is recycled**
- **Fully recyclable**
- **Phthalate free**
- **Minimal emissions**
- **Long product life cycle**
- **Environmental Product Declaration available for a complete "cradle-to-grave" impact assessment**
- **Supports the 'sustainable building policy' by contributing to LEED and BREEAM protocols**

Recycling

Mflor strives to minimise its impact on the world. The waste generated during the production process is recycled, the majority of which goes back into our own products and a small remainder goes to other, external facilities to create different products. Furthermore, our products themselves are fully recyclable.

Minimal emissions

All mflor products have obtained the Indoor Air Quality Gold certificate from Eurofins. So you can be sure that our floors always meet the strictest emission standards, as Indoor Air Quality Gold is compliant to and even more stringent than other international standards. Moreover, our values are well below the set limits.

Safe product composition

We prioritise safety and health above all else. Our floors are therefore phthalate free. As a result, they not only meet the most rigorous (REACH) standards for interior applications, but they even meet the extra strict standard set for toys and childcare articles that can be placed in the mouth. If our production team had their way, you could eat off the floor!
